

Why buy a Jupiter Science Alkaline Water Ionizer?

In 1982, Jupiter Science moved from manufacturing medical equipment to the production of quality alkaline water ionizers. Over twenty five years later, Jupiter continues to lead the industry in research and development and product reliability. As ionization grows in popularity there are many new manufacturers offering many new models which makes choosing that much harder.

Please note these important highlights:

- **Jupiter Science** is the number one manufacturer of water ionizers in the world and in the USA.
- **Jupiter Science** manufactures all their ionizing chambers in their research facility in Japan. This facility employs about 20 PhDs. All other companies in Korea claiming to be manufacturers are just assemblers, importing their cells into Korea from China.
- **Jupiter Science** has been manufacturing cutting edge, quality ionizers since 1982. Their latest models (Orion and Aquarius) contain another 3 new patented devices.
- **Jupiter Science** models consistently outperform the competition and always offer proven and valuable features - not gimmicks.
- **Jupiter Science** models have the lowest return rate in the industry.
- **Jupiter Science** sales and customer support capabilities are unparalleled, offering you top notch pre and post sales support. Only Jupiter offers service and sales on both the East and West coasts and a 5 year warranty on ALL models.
- **Jupiter Science** has been selling in the USA market for over 12 years - the next oldest company has only been in the US market for 3 years.
- **Jupiter Science** uses only genuine platinum-titanium for their ionizing plates. Models coming in from China or Taiwan are using platinum-iridium. They don't use platinum-titanium because platinum-titanium is 7 times more expensive than platinum-iridium. The Japanese and Korean governments do not allow any company to sell iridium for drinking water applications because it is bad for your health.
- **Jupiter Science** models carry the most certifications in the industry - UL, CE, ISO9001 (and soon will include NSF). Only Jupiter models come with a USA produced installation DVD, free pH test kit, and manual.

Please research well before you make this long-term investment for your health as there are many models on the market today. We are confident that once you have done your homework, you'll see why Jupiter is America's number one choice.

Changing lives in the USA Since 1986
Jupiter is the INTELLIGENT CHOICE
